The company delivered its highest ever Net Income, demonstrating its resilient business model in a mixed pricing environment. During 2025, Domestic Gas sales volumes increased to 2,420 TBTU, up 4% from 2024, driven by continued strong domestic demand and improved contractual arrangements. Exports & Traded Liquids volumes also rose by 3% to 1,036 TBTU, while ADNOC Gas’ share of ALNG JV sales volumes declined to 231 TBTU from 264 TBTU primarily due to planned maintenance activity.

Brent crude prices averaged \$69/bbl in 2025 compared to \$81/bbl in 2024, a decline of 14% year-on-year. While LPG and Naphtha prices saw a decrease of 9% and 11% respectively year-on-year, LNG market prices (JKM) were up by 7% YoY.

EBITDA in the period was \$8,636 million, flat year-on-year. Domestic Gas contributed \$3,382 million, up 10% due to 4% higher sales volume growth and higher margins from improved commercial terms following contract renegotiations. Export & Traded Liquids EBITDA was \$3,923 million, decreasing by 7%, while ADNOC Gas’ share of ALNG JV EBITDA decreased by 20% year-on-year to \$977 million. Export & Traded Liquids contribution was impacted by a lower commodity price environment while ALNG JV contribution was impacted by lower sales volumes due to planned maintenance activity and lower prices.

Full year 2025 Net Income was \$5,166 million, an increase of 3% from \$5,001 million in the prior year, driven by the increase in domestic gas contribution.

In 2025, ADNOC Gas progressed several major strategic growth projects including IGD-E2, MERAM, and the Rich Gas Development Project with capital expenditure reaching \$3,639 million, nearly doubling year-on-year. The company’s comprehensive shutdown program and robust asset management systems continue to underscore the effectiveness of its maintenance strategies.

## ADNOC Gas Sales Volumes (TBTU)

Note: ADNOC Gas' proportionate 70% share of volumes in ALNG.

## Outlook

We expect total sales volumes to be between 3,705 and 3,825 TBTU in 2026. As with prior years, sales volumes should follow a seasonal pattern with an uptick over the summer period. In 2026 our shutdown activity should return to normal levels.

In terms of net profit unit margins, we anticipate Domestic Gas Products to be slightly below 2025 as we do not include gas-to-electron sales in our forward-looking guidance as they only occur because of successful tendering processes.

For Export and Traded Liquids and ALNG JV products our guidance ranges are based upon a Brent price band of US\$60 - 65/bbl. While these products are typically closely correlated with Brent it is important to remember that, from time to time, individual product prices may decouple from oil prices in line with the prevailing supply demand evolution of the respective markets. In addition, Sulphur is expected to generate a further \$250 - 300 million net income.

Total investments are expected to fall between \$4,000 and \$4,500 million.
