

ADX Becomes First MENA Exchange to Open “Live: Market Data Directly to ChatGPT, Claude and Other AI Platforms”

Abu Dhabi, United Arab Emirates; 13 August 2026: The Abu Dhabi Securities Exchange (ADX), one of the fastest growing exchanges in the world, has become the first exchange in the MENA region to offer all investors, institutions, developers and market participants access to official “live” ADX market data through conversational AI tools like ChatGPT, Claude, and other large language models (LLMs).

The landmark integration marks the first time investors in the region can query a stock exchange’s market data in plain language via the AI platforms they already use — removing the need for specialist terminals, complex APIs or technical intermediaries. Through a governed Model Context Protocol (MCP) server, ADX is opening a new channel for market transparency, financial awareness and inclusion, supporting wealth creation and a more knowledge-based economy in Abu Dhabi and the wider UAE. This initiative opens up a new approach to the distribution and consumption of exchange information.

Greater Access to Market Intelligence

Abdulla Salem Alnuaimi, Group Chief Executive Officer of ADX, said: “AI is rapidly enabling how investors discover, analyze and act on information. As the first exchange in the MENA region to connect directly with major AI models, we are redefining how the financial community can take advantage of our market data to make informed decisions directly, intuitively, and efficiently. By removing technical barriers that once required a specific setup, everyone now has live access to ADX data through simple prompts. We believe this will contribute to greater market transparency, wider financial participation, and a more accessible investment ecosystem. This also reinforces ADX as a key pillar supporting the development of Abu Dhabi and the UAE’s capital markets and aligns with the emirate’s vision of an AI-inspired, knowledge-based economy.”

Direct, Secure, On-Demand Access to Official ADX Data

The ADX MCP framework provides secure, on-demand access to critical market datasets for AI assistants and agentic workflows. Users can configure their AI applications to read official ADX data sources through a simple, standardized protocol, with four usage plans ranging from a free tier to AED 49.99 per month, each structured with clear limits on usage, refresh frequency, historical depth, and concurrent connections.

Via this integration, users can retrieve:

- Per-symbol market depth, bid-ask spreads, and price-discovery signals;

- Multiple trading statistics, including retail versus institutional and foreign versus local flows;
- Structured, machine-readable XBRL financial disclosures; and
- Comprehensive index constituents and related reference data.

The service is designed to support a broad spectrum of market participants:

- Fintech developers and research firms can leverage data to build customized analytics, research tools, and AI-driven insights.
- Brokers can develop proprietary, white-label AI trading assistants to increase active-trader engagement.
- Institutional investors gain low-latency, source-grade order book visibility, and precise segmented data flows.
- Retail investors can ask natural-language questions to retrieve complex, real-time, official market intelligence through the AI platforms they already utilize.

The launch reinforces ADX's broader strategy to expand access to capital markets, strengthen market infrastructure and support the development of an increasingly technology-enabled investment ecosystem. By making official exchange data more accessible through AI, ADX is positioning market information to become more readily available to a wider community of investors, institutions, researchers and innovators.

More information on how to subscribe and set up the service is available at: <https://www.adx.ae/market-data-services/model-context-protocol/adx-mcp-plans>

About Abu Dhabi Securities Exchange (ADX)

The Abu Dhabi Securities Exchange (ADX) was established on 15 November 2000 pursuant to Local Law No. (3) of 2000, which granted the exchange legal rights with independent financial and administrative status, as well as the necessary supervisory and executive powers necessary to carry out its functions. On 17 March 2020, the ADX was converted from a public entity into a Public Joint Stock Company (PJSC) in accordance with Law No. (8) of 2020.

The ADX Group, a market infrastructure group comprising the exchange (ADX) and its post-trade ecosystem, including its wholly owned subsidiaries AD Depository and AD Clear, was established. Through its integrated and globally aligned business structure, the ADX Group supports efficient, transparent, and resilient capital markets across trading, clearing, settlement, and custody.

The Group provides an efficient and regulated marketplace for the trading of securities, including equities issued by public joint-stock companies, bonds issued by governments and corporations, exchange-traded funds (ETFs), and other financial instruments approved by the UAE Capital Market Authority.

The ADX is the second-largest exchange in the Arab region by market capitalization. Its strategy of delivering stable financial performance through diversified revenue streams is aligned with the UAE's national development agenda, "Towards the Next 50", which aims to build a sustainable, diversified, and high-value-added economy.
